

Record 1 - Brightwater Cardiology Associates - Office Visit

Date of Service: 05/05/2026

Provider: Dr. P. Adeyemi

Chief complaint: Palpitations.

HPI: 67-year-old female with new-onset atrial fibrillation confirmed on ECG and 24-hour monitor. CHA2DS2-VASc score 4, indicating anticoagulation is warranted.

Assessment: New-onset atrial fibrillation.

Plan: Start warfarin 5mg PO once daily. INR check in 1 week to guide dose titration. Discussed bleeding risk and need for consistent dosing with patient.
