

Record 7 - Fairview General Hospital - ICU Progress Note, Day 4

****Date of Service:**** 06/14/2026

****Provider:**** Dr. T. Anand, Hospitalist

Subjective: Patient resting comfortably overnight per nursing report. Mild lower extremity edema noted, attributed to IV fluid resuscitation during initial sepsis management.

Objective: Temp 98.9F, HR 82, BP 128/76, RR 16, SpO2 96% on room air. Lungs clear. Abdomen soft, non-tender. Labs: Creatinine 1.5, BUN 29, WBC within normal limits, potassium 4.2.

Assessment: Sepsis, improving. Acute kidney injury, stable per prior trend.

Plan: Continue current management. Daily labs. Nutrition and mobility per physical therapy.
