

Record 22 - Fairview General Hospital - Radiology Report

****Date of Service:**** 06/26/2026

****Study:**** Renal ultrasound

****Interpreting Provider:**** Dr. K. Nishimura, Radiology

Clinical indication: Rising creatinine, evaluate for obstruction or structural abnormality.

Findings: Kidneys are normal in size bilaterally, no hydronephrosis, no obstructing stones identified. No structural cause for renal impairment identified.

Impression: No obstructive process. Findings do not explain the degree of renal function decline; clinical correlation recommended.
