

Record 31 - Fairview General Hospital - Discharge Summary

****Date of Service:**** 07/02/2026

****Discharging Provider:**** Dr. T. Anand, Hospitalist

Discharge diagnosis: Sepsis of urinary origin, resolved. Acute kidney injury requiring hemodialysis, initiated hospital day 18.

Hospital course: 22-day admission for sepsis with associated acute kidney injury. Renal function declined progressively throughout the admission, with a renal ultrasound obtained on hospital day 16 showing no obstructive cause, followed by nephrology consultation and initiation of hemodialysis on hospital day 18. Patient's condition stabilized following dialysis initiation.

Discharge plan: Transfer to Willowbrook Rehabilitation Center, which has onsite dialysis capability. Continue hemodialysis three times weekly. Nephrology follow-up in 1 week. Primary care follow-up in 2 weeks.
