

Record 4 - Overlake Regional Medical Center - Operative Report

Date of Service: 03/04/2026

Surgeon: Dr. M. Okonkwo-Reyes

Procedure: Emergent laparoscopic-converted-to-open appendectomy with peritoneal washout.

Findings: Perforated appendix with surrounding abscess and purulent free fluid throughout the abdomen, consistent with several days of untreated appendicitis. Estimated blood loss 200mL.

Post-op plan: ICU admission, continue IV antibiotics, NPO, NG tube decompression.
