

Record 5 - Cascade Physical Therapy - Progress Note

****Date of Service:**** 03/10/2026

****Provider:**** Melissa Tran, PT, DPT

Patient continues PT, now 8 visits total. Reports ongoing night pain, difficulty sleeping on right side. States MRI has been ordered by Dr. Kowalski but not yet scheduled due to insurance authorization delay per patient report.

Assessment: Continued impingement-pattern symptoms with persistent weakness, unresolved after 8 visits - again noting these findings are atypical for simple impingement without a structural tear.

Plan: Continue PT, defer further plan changes pending MRI results.
